

*How to thrive as  
One family humanity*

*Compassion and Evidence*

## Introduction :

I never wrote a book and English isn't my native language, so I'm sorry if this is a bit messy.

I decided to learn English 4 years ago for one reason : **Being able to communicate with the most people I could.**

1 week ago I harmed myself because of anger, I did that because I struggle to compose my life in harmony, either in my relationship or for money.

So I start this book from the Hospital, ready to make a difference in the world.

I never felt in the right place in all jobs I ever done, I have got the bad habit to follow my heart and for all the jobs I ever done, my soul is crying and urging me to do something else. I couldn't keep a job for more than 1 year top, because in all jobs, **I've got this feeling that I'm a slave.**

I'm writing since I'm 17 at the period of my parents divorced so I got refuge into writing to myself, I'm today 31 and I didn't write since a long time (2 years, except some notes)

But as today I feel the urge to write.

And this time, I will not write for myself.

This time, I will write for the sake of this species that I love from the depth of my soul even if I am mostly disappointed by the behavior of most people including myself overall.

We aren't perfect, but we intend to be one day.

I started to write this in the hospital being heal by beautiful humans that are under numbered and works hard every day, every night.

I'm writing this book for them, for all the unshielded of this planet, for the sake of Love.

I apologize because this book will sadly not be perfect, I am myself far away from being perfect.

But I want to improve myself and I believe this book will help me and others to improve ourselves.

Do not give me credit for those writing, they belong to humanity and I do not want to make much profit on it even if I struggle for money, it would be impure and it would be even a breach to the ideas that I'm trying to give you.

And If I do make profit, it would be redirected toward making this world a better place.

This book isn't perfect, it's full of scattered ideas but the main mindset, the essential is there I think.

The only condition I ask, if you intend to use the content is that it should only serve humanity.

~

## **I can see 2 future for mankind :**

The first future I can see is a dystopian future, full of fear, lack of trust, hate, division, control combined with massive surveillance. A ugly pyramidal system and powerful A.I oriented to make us comply instead to serve us All and solve all issues.

I know the work of Orwell but to be honest I never read it, but I suppose this future would be the Orwell one. Or the selfish future.

The second future is the one I believe in the most.

I decided to do not give credit to those that want to inspire division, fear, and that want to enslave us even more.

I will judge myself what is right and what is wrong with the help of my Heart and not my Mind to determine my reality.

This second future as I can see it, is glorious and beautiful.

It's the whole mankind that is filled with joy, harmony, Unity and Love before all.

I want to manifest this 2<sup>nd</sup> future more than anything, and I would be ready to give my life for it.

Whatever happen.

If we want to establish balance upon earth.

it shouldn't be done with violence, vindictive or any other lower forms of vibration.

It would tain the ideas that we support and it would again put us into a circle of violence.

So in the name of mankind and the well being of It All, I beg you to be smart if you intend to follow my ideas.

Where smart = evolved, kind and altruist.

I'm just an idea maker, continuous river of ideas are flowing in my brain and still yet I've never been able to succeed in Life.

Because the truth is.

Money has never been a sufficient trigger to put me into work.

Today, even with all my struggling, I'm happy.

Even if sometimes I collapse, I stay happy deeply, because I know.

I feel and I know, that this life is more than just what we have been told.

But you will not find the truth in religious book.

You will find them in yourself.

**Temet Nosce.**

°(I defend Intuition mathematically (The Code UK Tv Doc) because if you take a big jar and filled it with tiny balls and ask 200 people to guess how much balls there is, it has been proven that the average of all guesses determine the real number of balls in the jar (very close), if we all look within ourselves and compare Data, we will find the Truth, then we can try to prove it with the help of science.

Since I'm mortal I gave up all my energy since childhood into my Intuition, I believe it is my most powerful tool, I sometimes feels I could be "God" and I think everyone is able to have this power.

**The Truth is that everyone is able to connect his frequency to Source/God.**

In Life Thus In Love I trust.

In Love Thus In Life I trust.

**I love you**

~

**The Beginning.**

*There is a special time for everything and this special Time is dedicated to present time and humanity*

*Layer 2 : ° Post Notes N°1.*

*Layer 3 : ° Post Notes N°2.*

*! : Consider all of this with IMO (In My Opinion) I don't speak THE truth, it's just my opinion. Take the best from it, that's it.*

1. *Division among our species (Religions, races, countries, beliefs, political dogmas etc.)*
2. *Fix the Fear of Death*
3. *The necessity to allow hallucinogen drugs in our society, war on drugs failed and give more responsibility to people is the key.*
4. *Technology and his limits In a Capitalism system. Necessity to impose limits that should not denature human and earth, it should work by respect and in harmony*
5. *Money revision and interdiction of allowing capital in Politics*
6. *Compassion and Evidence*
7. *Capitalism serve Evil without Compassion. Capitalism should be revisited, competition bring the worst from us, it will only advantage Selfishness*
8. *The concept of family revisited, annihilate source of division from the core. (Utopian future idea)*
9. *Taxes, yes but only for health, research, education etc. not army.*
10. *Critical thinking is mandatory, use your brain and analyze things instead of accepting them like you have been told, even my thought and writing, do your own research always.*
11. *Plant fruit trees everywhere, automatize job that can be, give yield from automatization for public entities, A.I to calculate all ressources, recalculate the reward of a job depending of other metrics than just offer and demand.*  
  
*My vision of the world and how I think we should live, (shelter and food provided to all citizen)*
12. *The issue with words and definitions or some important keywords such as “Drugs”, “Communism”*
13. *We want to Avoid Cloud atlas scenario “Corpocracy”, massive surveillance, fear world instead of a creative, love world.*
14. *The day army and police understand they are on citizen side.*
15. *A silent, harmless, pacific revolution*

16. *Dopamine addiction in many level is a problem, consumerism etc.*
17. *Religions, ok but only if it gives positive outcome, it shouldn't inspire you division and violence, it's should be a fundamental law*
18. *The will Seek for ugly traits have to cease : Empowerment, Fame, Recognition even etc. (We should be above all of this we aren't child anymore. We should see as a group and kill our Ego all of us. It's the real challenge and what will make us evolve.*
19. *Technology for the good (Scarcity, algorithm of resources calculation at high scale)*
20. *Synchronicity and message from "Programmers", "Angels" Or whatever it is.*
21. *Create exchange of service and goods through crypto and more precisely Monero.*
22. *Love between us before All / Give to Love a chance to be our main Lead.*
23. *Materialistic vs Spiritualistic view.*
24. *C'est pourtant très simple*
25. *It's yet so simple*
26. *Share the prophecy*
27. *Make the democracy fair (Use of Blockchain visible to all and mathematically impossible to be cheated on)*

## **1. Division among our species**

Why ?

Differences (race, religions,culture, country,gender) Intolerance, Beliefs, Lack of lucidity for life and after life, selfishness, political dogmas, rich vs poor etc.

How to fix it ?

Acceptance, Trust, Spirituality, Science, Compassion, Forgiveness, Altruism, Open mind, Get out from comfort zone, unconditional Love, vibrate in Love according to divine source (God, Universe, Reason and virtue)

Unity is the key, considering each human being like your own family is the answer to solve this situation.

Strong beliefs that inspire division and violence and submission of another human being should be dismantled.

It is logic to me that without a compassionate regard toward each human being and living things, we cannot thrive as a species.

We shouldn't do more for those that resemble ourselves, we should be objective, impartial and consider everyone as equal.

Defy all bad traits triggered by our instinctive nature like doing sex without purpose other than dopamine, use of violence, seeking domination over others, being racist and care only about your own family even or your own tribe etc.

(And here I quote about the bad energies tricksters : ***“Fearful, Paranoid, Delusional, Disempowered, unbalanced in our emotions, hopeless, vindictive, violent, envious, perverted and all other aspect of lower vibrational expressions, collectively it manifest as things as war, tyranny, famine, disease, abuse, pollution ” Share the prophecy. (Link last chapter)***

Our animal traits should belong to our past now.

“The next rule of life “: is that competition drives adaptation. “ Believe it or not, just when I work on this passage, suddenly appear this statement from “Life on our planet S1E1 with the title “The Rules of Life” on the TV put by my gf randomly that's crazy.

Just at this right moment where I'm working and also struggling to counter the ideology that we need to follow this order and thus allowing capitalism in extreme pyramidal shape without taking care of others that this sentence appears.

This is exactly my point. It's crazy how life give synchronicity like this, this is exactly what I'm talking about when I speak about either destiny, no free will, messages from invisible forces. That all of this just a layer, or even a simulation.

Aren't we evolve enough to do not use each other ? Isn't this a perfect example that since animals are inferior intellectually speaking that we should do anything to leave this state ?

Why being so scared of being equal and rich ? Working hand in hand not for selfish and ego centered dreams. But for the sake of everyone and of progress.

We want to get away from our primitive, animal traits to Evolve, not the opposite.

Separating races and culture isn't the answer, because let's imagine a nation lose his territory for diverse reasons, will we let them die ?

I know some people are worried about the genetics our ancestors made years to achieve. But in the end you have to consider logic above all, to me, it looks obvious that we should all get along and consider everyone as equal because let's imagine the “Day after tomorrow” Scenario happen ? Why racist people are worried, what is the distinction of this “Race” ? The color of the skin ? Historical preservation of the DNA?

Is there not technology nowadays to create babies while manipulating DNA anyway if you want ? and so if race are important because of any reason, we can still preserve it while merging ?

if you feel superior because you saw some facts that support your ideology don't you think one day DNA manipulation might outsmart the smartest WHITE? BLACK? ASIAN ? Men or Women alive anyway ?

If you really want to play races and performance, you and your ideologies will be outsmart by DNA manipulation soon or later. So why do you care ? The looking of individuals ? ....

We should let this happen naturally and stop being afraid of things that doesn't matter at the moment.

When you are falling from the edge you don't look if you still got your pants no ? You pray for muscle strength and a strong will to save yourself from this situation.

I can get the racist point of view somehow, but I really think at the moment, it's not the priority.

(<sup>2</sup>Personally when I walk on the street, any human I see are equally my brother or sister. Sometimes I go so deep on the idea of Universal Love that I could cry of Love, exactly the same power than when I first took MDMA in 2019. This feeling is still there, it made me realize that Love is the key of solving all issues in this World.

One of the major problem on this planet is people have tendency to categorize in the same box quickly about anything. I'm not an "Universalist" and if I am, it's not like you imagine it is, like the fake elites plan to do.

I encourage NO DIVISION of all sort physical and social etc. and plus stop giving names to thing that are so wide please...it goes the same for "Drugs", "Socialism", "Capitalism".

We should create more variation and families of those words to defend ideas.

Stop speaking words that have no existence, what matter are facts and facts are that this SYSTEM IS BROKEN and mainly **BECAUSE OF DIVISION OF ANY KIND.**

My first priority is to dethrone the ones that manipulate us and push their agenda through lies and corruption, it is true that some of their ideas magically correspond to my vision of the perfect world too, but IMO they do it in the wrong way, they want to do it on the based of "Control" and I want to do it on the based of "Trust".

From should just take the best from everything.

We should stop labelizing and judge so quickly...there is good to take everywhere.

In religious book for example, stop applying the religious books like a math book or a recipe to reach "Heaven", analyze it and fill the rest with your heart...

Stop believing, go with facts and if you can go to the theory that seem closest to logic, and use your feelings.

My equation logic for a perfect system that apply above all rules would start with

**“God/Life is infinite source of love and 3D life is designed to make us evolve”.**

Because since we live in a world with multiple other lives, interconnected dream.

Then by logic altruism is more virtuous, logic and harder to pursue than selfishness.

Selfishness = Division, and thus force us to act against others because we share it all in a limited resource world.

If we want peace how would we reach that by logic ?

By Eliminating  
**DIVISION**

Whether it's race, nation, religion, beliefs, political ideology, gender etc

What matter the most isn't to worry about the next generations being half black, half white or whatever at the moment.

What matter the most at the moment is : **PEACE** and **UNITY** in the name of **SCIENCE, LOVE** and **SPIRITUALITY**.

Do you really think that a race entire can disappear in 2 or even 3 generations ? Is this something urgent ?

I personally go for trusting Life.

I want to push the agenda of **Love** toward all mankind and no division before anything else.

Accepting differences, consider everyone equally, being tolerant and compassionate is mandatory.

We should conserves human races why not...But it looks unnatural to always seek the control of everything in the realm of God.

I know some of you aren't God believer, but if you are....You can't have faith in God and be a racist, it's sounds...incorrect.

God is All, so God is math too.

Why God / Universe would have let so many ethnic in the same Globe anyway...it's a damn globe we live in the same place, eventually and by the Murphy's law; anything that can wrong will go wrong.

And “wrong” is also a point of view here.

Don't you think God is Love ? And if yes and you acknowledge that then why would God have put us in the same world while looking so different ?

Don't you think it was meant to be ?

What if tomorrow we have “The day after tomorrow” scenario and we are all force to live all together ?

Maybe it was always meant to merge, we can't counter the nature of things.

Taking too seriously the things of this dimension is also something that should be reconsidered IMO.

Since our lives here are ephemeral, and that the existence of other dimensions is I believe real. (Listen to the woman that speak in the Audio "Share the prophecy" on [One Family Humanity](#) )

This 3D envelop isn't real life, and I felt it like this since my 20's

I am not medium, I just use my intuition, so it didn't surprise me when I learn about the real existence of invisible entities that comes from other dimensions in my brothers and sisters mediums testimonies.

I think we should agree to this essence if we want to live a life of peace and harmony :

**What matter the most in this world is that we grow together safely and equally, with love and science.**

And also we should acknowledge that things might goes beyond our control. [Stanford scientist, after decades of study, concludes: We don't have free will](#)

So forgiveness and teaching for others that doesn't know instead of punishing and being intolerant, seem to me a better logical option.

[René Girard](#) says that if we don't drastically change toward non violence overall we are meant to disappear as species and I agree with him.

When I meant we should thrive with compassion and evidence, it doesn't mean we should stop look for answers In ourselves, spirituality is important, I'm myself partisans of those that think that the Universe is conscious, that God exist.

I just do not look on old books that have hundred of years for it.

I use my intuition and critical thinking and also sometimes hallucinogen. (since 2020)

If you want to hear more about my experiences, I will describe further in a next chapter why and how I end up to think like this.

I promote Compassion and Evidence because as a society we should go forward with facts and not beliefs even if I personally feel that god exist, until proven or acknowledge by most, it can't have weigh in decision making for society.

But anyway, in my world God is Love so it match with compassion, so it can't hurt in the decision making.

In my opinion : We should use our Heart to weigh those decisions and not the Mind. Don't think too much and feel more.

Also, morality is more important than human laws.

Morality according to laws of the Universe.

We shouldn't let a language, a race, a religion, a culture divide us, it sounds childish.

We should go closer to what is the closest to natural but also we should.

For example being gay or bi, even if I can understand and I'm happy people thinks this is cool.

Is naturally wrong. Because it doesn't serve any other purpose other than pleasure.

Which is the definition of perversion.

I'm really not into a vibe where I want everyone not being gay, everyone evolve as his own rhythm and we should help each other in that way but it shouldn't be promoted as an example to be follow.

I'm sorry.

I try to be objective here and believe me my Life has been weird in many context, I can understand the seek exploration of anything but it has limit when it involve first innocence of others and so influencing in the bad traits (Because yes being gay is bad following God's will and logic) it's a deviance.

BUT.

IT DOESN'T MEAN IT'S A BIG DEAL.

Don't make a fuss about it....

Help instead and support and if people will not evolve on this Life, they will evolve in their next lives, it's up to each everyone of us to decide what he or she is reading to give up as bad traits on this life.

This is what we call wisdom I Suppose..

Tolerance above all and help each other to reach our highest potential in peace and if people want to be gay let them do it as long as it stop to reach children eyes though in a too meaning purposeful way, because it's an adult thing...if that happen naturally the child will learn alone but it shouldn't be consider normal, it should be consider like an addiction IMO. (Sex addiction)

I know it because I experimented this train of thought myself, I went into the abyss myself, so I know enough to teach that indeed it's not the way it should be.

It's like vicious drug use...

You need to fight it.

But not at a point where it endanger lives or happiness of someone, or yourself.

Feel free to be gay, but known it's not logic.

Everyone should be free to live like hes/she wants as long as it respect others.

It doesn't go only with gay, perversion is also in straight level. Sex addictions used like a drug is a perversion. It's a fact.

I am myself addict to stuff like this and I try now to conserve those pulses unless necessary which mean, procreation or make love with actual real **Love**.

I didn't make the rules, the Universe did.

## **2. Fix the Fear of Death**

One of the main things that bring pain to our world is the will to survive at any cost.

Most people still have this instinctive trait that would allow them to hurt others to survive.

I don't speak about defending ourself but attacking or prioritizing your own before the others shouldn't be existing in a perfect society.

I know it can seem weird to say this but imagine if you were in a position yourself where your life depend of the choice of someone else.

Don't it seem more noble and virtuous, even glorious to sacrifice ourselves for others ? No matter who they are ?

If you stick to the statement that this life is only 1 and then this is nothingness, your chance of sacrificing yourself or have higher thought such as this one would be difficult.

Because why would you want to do this anyway ? You have only one life.

For me (because I can't speak for others that believe in afterlife anyway) it's completely different, since I look for the answer of life since I know "Death" exist

And by intuition and lot of years of research and signs (synchronicity, messages, intuitive ideas) I acknowledge the existence of an evolution of the soul.

To me it seems totally illogic that we are alive only once, since there is so much to discover and we are capable of so much but in a limited time, a finite world, and a mortal life.

What would be the purpose of this if there were only 1 life and nothing higher for us in terms of intellect.

What would be the purpose of having such intelligent shell in a limited world?

**"The eyes don't see what the heart sees. "**

You should watch the documentary “The Power Of The Heart ”, in the first minutes of the movie, they show scientifically how the heart react before the eyes and the brain.

It’s crazy uh ?

That’s why Charlie Chaplin is speaking in [the dictator speech](#) “We think too much but feel too little”

It seems to me that this whole 3D world is a consciousness Test, and I’m not the only to think this or even received this information from entities that aren’t from this dimension, the reason of why we don’t know nothing about afterlife is to see how we react by not knowing, it’s on purpose and it’s a test.

Acknowledging that there is only 1 life, let suppose that such person will act more selfishly (by logic,there is always exceptions)

Acknowledging there is an evolution of the soul and that our memory has been deleted on the purpose of learning seem crazy and out of science fiction for many.

But why did I come up with this idea alone in my room , exempt of external thought, while looking for the answer? To find later on that others thought about this theory too.

I also discover in 2020 while my first trip of LSD that  $0=1$

Later I discovered that I didn’t find those ideas, but I connected to the source, I was sync in frequency and manifested my answers. (You should get more info on the net about it, it’s very interesting.)

<https://www.cia.gov/readingroom/docs/CIA-RDP96-00788R001700210016-5.pdf> (Power of manifestation)

For example.

One day a weird experience again with LSD, it happened to me very recently. I was in my favorite place at 15 min walk from my home, that I btw discovered while exploring randomly, a perfect secret place that has a water flow and looks like Eden.

One day I decided to take a full tab LSD Alone on this place, in summer.

While I had many thought and feeling, I experienced at a moment something that I never experienced before in my life.

I was thinking about the Love I have for humanity then I shifted on the well being of them, then I started to cry for all the suffering in this world.

I was crying and shaking and I started to imagine waves of light and love starting from my point and doing the full circle on earth, to cancel all the suffering and inspire true unconditional love toward the entire planet.

It was the 8/8/2023.

This day was the most significant day of my life and this shaking, cry moment was feeling like a trance, I wasn't controlling it, it just happened and it felt very very powerful, like if I had the power of God in my hand this day.

The next days I saw this [article](#) speaking that an unknown light went from the sun to the earth, a gamma light.

I did look for gamma light in youtube and in term of spirituality, Gamma is the meaning of spiritual awakening.

I have no proof of anything but I really think something very weird happen to me this day.

I'm speaking all of this because, I want to inspire you to look for the answers in yourself.

And if you are an adult and consent to take safely some drugs ([halucinogen](#)) to enhanced this, then I believe you should be allow to do so, if you feel it and did some research before.

To me it was the most amazing experience I ever lived.

I always had beautiful experiences with LSD, you should not consider those type of drugs such as LSD or mushroom as an escape but a way to explore instead.

It should not be use if you have bad mood. DYOR -Do Your Own Research anyway. There is an excellent doc on netflix and you will find more [here](#) or here <https://www.youtube.com/watch?v=XqWbIVlnmNM>

I also had the luck in my life to have the best outcome possible when this is about god, I always had those event that happened along the years that confirm more and more my beliefs, it's only since 1 year or 2 that I'm firmly thinking that there is more, I have no more doubt.

Before that it was just agnostic thought, wondering about the world but still with a "?" as conclusion.

Today I have my answers and it's up to you to look for them too.

I think discover the truth about life come with time and effort, I'm still learning everyday.

I did experienced in my life an accumulation of crazy event sync in time and thought to reach to a point where I can't deny anymore the existence of something invisible that try to speak with me.

Those last 2 years, I received many information, many synchronicity, many messages hide in numbers, in mirror time 4:04, 1:01 etc. Always linked to a thought deep and checking time to acknowledge his importance.

Later I discovered that there is entities that give those messages to us. Once again you will find more answers in the audio "Share the prophecy". <https://onefamilyhumanity.org/media/Share%20The%20Prophecy.mp4>

(I don't know this woman, It has been given to me personally then it has been deleted from the official website and I'm happy today to sharing it with you)

If I went to all those process thought, it was because I wanted to know what is DEATH ?

My mom speaking to me that this life has an end was torture to me when I was 7 or something, so since then I went to many process of thought to end up where I am.

Today it's not a belief anymore, it's for me like a personal "fact", but I can't give you this fact, you will have to look it by yourself.

If you reach my state you will really see the world otherwise than you ever had, and I feel way more happy than ever since I know there is more.

The spiritism doctrine help me a lot too, when I saw the work of Allan kardec, chico Xavier, Divaldo Franco or even this woman speaking in this audio "Share the prophecy", I never experimented such things but It's on my bucket list, I want to see a real medium and try to speak with entities too because I need some answers.

I want also to experiment it scientifically.

Even if you don't acknowledge those paranormal event as real, have you seen star wars ?

Yes it's a movie, but to me it's closer to a bible, a spiritual guide movie.

The jedi reach immortality in natural way, he has all the good trait that are provided by light.

The sith is the total opposite, he wants immortality in his physical matter, ready to do anything to reach that state and is inspired by anger, fear, hate.

It's seem logic to me that George Lucas wrote those movies to explain the nature and meaning of Life.

And I'm thankful to him for this

So to not be afraid dear sister, dear brother.

I'm here for you if you need to talk to someone, I'm available for all the people that are reading this and desire to find light, because I know myself that it's not easy to be in the "?" world.

One advice, trust Life, trust in a positive way that this Conscious Universe, isn't by nature evil, but the opposite, it's all about Love.

**Help others more than you could do for yourself. It's the key for having a beautiful world.**

I'm not into religions sincerely, some passages are interesting and some aren't, eliminate the ones that aren't please, banish Violence and Division from those books, update them by listening and feeling from God / The Universe / Life

I'm not in religion because I see how it divide people, and people are interpreting badly sometimes those old talks.

Some books like Talmud or Coran even Bible probably (I don't know for Bible yet) contains passages that inspire violence or division against those that aren't from those religions.

I don't want you to be hurt when I say this, I just want you to come back to the essential.

The essence of God is Love, which mean we should consider everyone like sisters and brothers, equally without this mentality of protecting only the ones that resemble you the most but everyone else.

One Universal Unconditional Love.

It is my dream to see one day, the whole humanity hugging and forgetting their differences.

Take the good in those religious books, we don't know who wrote them, you should never listen to something that inspire you division and violence anyway; it's against the nature of the universe and life.

Planets orbit the sun because they are supposed to, they don't act like atoms running away everywhere trying to escape their hard reality.

It's the same for us.

Life is little compare to nothingness, so we should try to help each others instead of opposite.

Wouldn't you more happier to live in a world in peace ? A world filled with love and harmonious progress ?

I let you decide.

### **3. The necessity to authorize hallucinogen drugs in our society, war on drugs failed, give more responsibility to people is the key.**

*Drugs allowance (Hallucinogen) for spirituality and love infusion, understand of the law's of the Universe by intuition, frequencies, spiritual realm. Exploring inner self with scientist methods if possible.*

Did you know that you can't overdose or get physically addicted to LSD ? Did you know that you can vibrate in some frequencies that will help you to discover things you wouldn't discover without it ? Some part of your brain will be accessible like it never have been before because of it.

LSD

Did you also know that L.S.D is considered like a nuclear bomb of the consciousness and it has magically appear at the same time that the real nuclear bomb has been invented too ? :)

Why those drugs are classified Class 4 like heroin and opioid in many country ?

It doesn't seem logic, when I see the opioid crisis in America caused by big pharmaceutical lobbies that create this issue “

### [The Opioid Crisis explained in under 5 minutes](#)

You know why I feel happy with myself ? Because I'm not a sheep. I think by myself, I do not accept things like I have been told, I look for deeper answers and meaning.

LSD, Magic mushroom, MDMA . There is even a doc about it on netflix...those are the good drugs believe me.

You can't overdose from LSD or mushroom.

MDMA and Extazy yes, since it belong to the family of amphetamine too but is beneficial to human because you will be filled by true unconditional love while tripping, a one life time trip can help to cure many mental diseases, and rewrite your brain like for all hallucinogen, DYOR anyway, it's important.

I only promote the hallucinogen ones, I don 't even promote weed that can be harmful in more hidden ways and obviously even less alcohol that is destructive for health and society (Even if some people thinks it is the reason that we have evolved that much.)

Why I think it would help society ?

First, we lack of time and we need something huge to reset everyone to come back to essential

Segundo, Because once you experienced those, **You Will Know** what I meant from the beginning of this book.

We need a drastic consciousness revolution **RIGHT NOW** and I believe hallucinogen can greatly help.

As much as me, you will normally feel a moment of interconnectedness, filled with compassion and true love.

You will see this system like something against nature, something not right.

I remember when I took those mushroom for the first time with my brother and looking at industrial food with disgust but I was happy to eat something natural, same when I took some mushroom and went to the groceries, everything were looking....ugly.

That's why our gov are forbidding those drugs (IMO), because they don't want us to see clear and lucid.

I agree that some people are fragile, psychologically and that's why it should be allow but also oriented for those in necessity.

**Does the war on drugs function anyway?**

In my opinion, we should encourage citizens to be more responsible and educated instead of treating them like child, it would advantage way more this war on drugs.

Take a look at the politics of Portugal, they are a good example of the benefits of giving more responsibility to people.

Also (Schizo scattered thought) :

I think labels like “Drugs”, “Communism” are harmful, because people tend to put everything in the same bucket, which is completely stupid.

Think by yourself and stop accepting rules from fake Government that just want to enslave us.

Follow moral codes before anything, forgiveness, tolerance, love, help others and don't use vice or lies to do anything, act by virtue and reason like the planets orbiting the sun.

Be true to yourself and others, that's the way that will help us to build a beautiful society.

If you need advices let me know, you will have my contact at the end of the book, everyone is welcome in my Heart and we can learn together to reach our highest potential.

Friday 27 2:27

I have to tell that while first trip MDMA (Extazy more precisely) the algorithm spotify was perfect...I don't know how algo are following me so closely on the events of my life, I suppose it's because of the microphone if I want to be rational, but anyway, this song that was playing while the peaking happened was one of the most epic moment of my life.

Here some of the sounds I had from spotify algo :

<https://www.youtube.com/watch?v=QgZr0aYg1i8> Champion – Tawounga

<https://www.youtube.com/watch?v=sOAYK47OLfk> Napolese – Ochre

I felt the Power of Love in an immense, gigantic wave, it was en 2019.

You will never experiment a high this much than the first time so it has to be the best product and the best high, but always be careful, drink water a lot cause it dehydrate and be with experimented people that are trust worthy if you are beginner, take slowly and don't drink too much water either, because it's too a reason of why people get hurt with this drug.

MDMA is the only drug that I promote that is not risk less physically speaking, so just take care when doing this so **DYOR (Do Your Own Research)**

It belongs to amphetamine, thus you can be physically addicted if you are weak, it has to be an experience.

A rare One.

1 one life time trip on this drug will make you realize how fucking beautiful is life.

You will suddenly forget all the things that doesn't matter.

What matter suddenly the most you will realize, is **Love**.

Imagine the whole humanity dancing and filled with pure happiness and love toward everyone.

[Whale - Sainte Vie](#) Feel it, imagine it.

I never quit this perspective, this vision of the future and that's why I'm writing those lanes.

Because I want it to happen.

I don't want anymore of their mass psychosis that provoke so many pain to our species.

I might develop further, but the essential is there.

#### **4. The limits of technology advancement and his impact in a capitalist world**

Often I speak with my best friend about the actuality of this world,, often we speak about technology, and how the world is rapidly evolving with it, but I often bring the idea of morality within it.

To me it looks like technology will bring us further in evolution but also maybe in the wrong way or wrong direction if we do not pay attention.

Nature is so beautiful and complex by itself.

Many human nowadays would love to become a cyborg with more power but to me it sounds also a bit ugly.

I love technology but If I have to choose between a day in front of my computer and a day outside I would prefer to be in the wild taking a bath of sun.

Often technology is considered like a tool of Evil and it's not for nothing. We should be careful about how we use it, I don't mean that it's not beautiful and that it will not allow us to be a better civilization but it should always be in a way that doesn't consume our humanity.

Elon musk is willing to create a chip (Neuralink) that will be installed in your brain and that will allow you to have unlimited memory, speak instantly to another person without speaking etc.

A human with a chip will be like comparing an human and a monkey nowadays, the difference will be so wide that in this capitalist system it will be almost impossible to avoid to have one if you want to be competitive in the work market. (I speculate)

Imagine to be able to literally learn a language in a matter of hours?

All of this seems really interesting but it should not be mandatory because the competition ask for it.

A world lead by capitalist/pyramidal rules coupled with technology like this will be dystopian.

If I would create a society it would be toward exploration, but still I would try to establish something that match our nature and the environment.

If someone want to be a cyborg, ok, but it shouldn't be mandatory way, and mandatory can be indirect, check for example the TV Series "Love, Death, Robot", it's a bit like the TV Series "Black Mirror", there is an episode on it where a child isn't enhanced like the others and become pressure by his pairs for this.

With technology we could do so many beautiful things but the issue is that we are living a pyramidal system and it WILL turn into a nightmare for most of us.

In a perfect beautiful equal system where we take care of each person on this planet why not, we could even use the powerful computers to calculate all resources and divide them for every human being.

Like I say all the time.

I personally cry inside when I see someone living in the street or when I see a doc about the cruelty of cocaine market or cobalt mine etc.

How can we live like this ? Being happy while knowing that other are suffering and are suffering without necessity.

Because it's a lie that we don't have the resources to provide to everyone, greed has just poison our soul and no one is seeing it.

It's ok to want more because we have dreams but it shouldn't be while sacrificing life of others, and the motive should be toward us All not for selfish desire and dreams.

I understand that it is hard to accept death and that we have one life and so that we need to evolve quicker but like I said previously doesn't seems also a trick? A test once again ?

Don't you feel your heart broken when you know that the phone in your hands is the result and consequence of many desperate souls ? [The Disturbing Reality of Cobalt Mining for Rechargeable Batteries](https://www.youtube.com/watch?v=CIWvk3gJ_7E) [https://www.youtube.com/watch?v=CIWvk3gJ\\_7E](https://www.youtube.com/watch?v=CIWvk3gJ_7E)

Is this ok to go forward in time while sacrificing life of others ? In the name of evolution?

One human life worth another human Life and it should always be like this.

The capital of someone is nothing compare to the wide and yet unknowledgeable laws of the universe.

What is all our stuff compare to this beautiful unknown ? Material vs Spiritual point of view.

We are dust and will return to dust no matter what even if you succeed to live 1000 years, or 10000 years.

So if you intend to choose the Sith path, know that you might be your whole life off the mark.

The Jedi find immortality in the natural way while the Sith is trying to reach it by any way in the glitch way.

Yes it's a fiction, but it sounds to me like a pure logic and this is what is exactly going on nowadays and will going on in the future.

People looking for immortality because they can't comprehend or feel by heart the world we are living in.

I trust the Universe, it's a huge feeling and a lot of internal research.

I'm convinced today that I would rather stay mortal than to have to live immortal in such ugly world.

A world where the capitalism is bringing the worst of us, always the selfish path.

In a world filled with Love and Light, I would gladly accept immortality, but not here.

I'm feeling a urge sometimes to die because of the suffering I can feel in my own life or the life of others overall.

Have you seen what China is doing ? Massive surveillance, All in one APP ? Do some research about China credit social score, it's ugly as fuck.

Technology is becoming a tool for control in this system and people are forced to behave or to apply to the rules of this system to survive.

And often it's illogic but I will come back to it on next chapters.

## **5. Money revision and interdiction of letting capital influence Politics**

Money, money, money.

Why this ugly thing is leading our lives ? All this greed and selfishness toward it. Trying to be above one or another to have a better place in the pyramid.

Since I'm in this world, I can't stand this thing, even working for it isn't sufficient motivation to me to put myself into work.

I'm someone that is listening to my heart, that's why I've been living through hell my whole life.

Because I can't keep a job more than 6 months, 1 year top.

Often because the productivity and stupidity of rules inside the company, it's always about this dumb rush, run.

That will only profit at the end the ones at the top of the pyramid.

When people will realize that it's modern slavery?

Sometimes I try to imagine a world where there is no money or something different that would counter the idea of accumulating.

I agree that in society if you do a lot more for others and bring a lot of benefits to people you should be rewarded more but...this capitalist system and nowadays it doesn't work like this.

Today, I tend to believe that those that deserve the most doesn't have and some people just find the trick in the system to become some super millionaire or even billionaire, I'm not jealous about this, I don't even care.

But in my opinion this capitalism isn't fair. It isn't fair because even if you are rich, you can end up in debt and finish in the street if you end up in random event that will f\*\*\* you up.

Is a world without money possible ?

Let's imagine that we are living in a world where all basic needs are met for everyone in the planet, every resource human and else are calculated by powerful computers and A.I.

There is no more scarcity in the world, no more famine, no more suffering.

Machine could really help us to provide such thing.

Nowadays people see machine that replace workers as something bad, which is true because they are getting replaced and don't get any bonus from that, because this system only advantage selfish causes.

Without social our world is doomed, it's a complex topic, but I sincerely think we should go back to the essential.

Imagine a clean society where everything is provided, and your place in society is mainly the same except if you work to help society to have a better future and you would have some advantages.

I'm still lacking of perspective on this, I didn't do much research but what I know for sure, is that we can't let this thing dictate our lives and inspire division once again.

I suppose that someone that is already rich wouldn't like to read what I write.

Because he/she would lose everything.

But if this person was a bit less selfish, then she/he would understand.

How can we live like this ? In a pyramidal system that promote slavery of others ?

Why no one is seeing it ? That this slavery pyramid is always there, it doesn't belong to the past, it's **TODAY** a subject of actuality.

They will tell you we have choice, but it's not true, it's hard nowadays to find a job and even more to keep it in a healthy condition.

Always pressured by our pairs that received orders from above, always above, who is going to gain from this pressure if not the ones at the very top of the pyramid?

It's all an illusion, to put us in cage, minimum wage is a invisible cage to maintain us in the circle rat.

In an utopia society basic needs would be met for everyone (even if you don't have a function), machine would work for us all as much as possible and yes there would be people that want more and want to participate more in society which is beautiful but it shouldn't reach a level where you have so much wealth that you can't even spend this fortune in your own life. (Check the video of jeff bezos measure in rice, 1 rice = 100K) here =>  
<https://www.youtube.com/shorts/3VFmmqFCoM>

I don't have yet the keys to solve this issue, because it's true that a full communist world wouldn't be maybe that fun, some people wants more and they are creative, but in the other way, is this cool to let behind those in needs ?

I think we should think about something that would stop the ugliness.

I'm not completely against capitalism, but I'm seeing how it makes us, and it just promote the most ugly traits of our personalities.

It's easy to understand that in a competitive system, there is no friends, it's all men for themselves, like a raging war to provide the most for yourself against all others.

And THAT is damn ugly.

We should work as One, united with the same goals, providing all basic needs to everyone, encouraging education, self awareness, spirituality, work, in a good way.

Some people might even want to do nothing (Lao tzu - Wu Wei philosophy not for dopamine addiction) and it would be possible because everything would be automatized, and I'm pretty sure that things would go well because its not everyone that want to do NOTHING.

A lot of people are eager to participate to enhanced society but sometimes they can't because they struggle to survive.

You should take a look at this video which compare a world of surviving and a world of creativity.

[Survival VS Creation - Dr Joe Dispenza](https://www.youtube.com/watch?v=MtimAuhyp-M) <https://www.youtube.com/watch?v=MtimAuhyp-M>

I will later complement this section and update the book, because I feel I lack of content to provide a solution.

But I suppose the essential is there, you get my point and you see too that this world can't continue like this, it's so ugly...

I really think we can find better ways to our society.

Consumerism has is limits, stop being drug addict of products, be addict to knowledge and well being of everyone instead, isn't it more noble ? Pure ?

Do you really want to be ugly ?

And I didn't even speak yet about the interaction of money in politics...

Imagine living in a world where your own president is financed by big corporation that are also the reason of your suffering.

I take here companies like Nestlé that will dig well and sell you the water they find in your own country, water is essential to live, how evil is it to sell it ?

One day I was walking in Montpellier, France. I had a huge thirst and I was in the middle of the city, I was looking to buy some water and it was the summer, a very hot day.

When I approach a stand in the park, a bottle of 0.25 cl was worth 3.50€.

How in the hell can we sell water at this price ?

Using basic needs to make profits is Evil in my opinion...it's greedy as fuck and it doesn't align with gentleness in society.

How can we accept that society like Monsanto are lobbying our government for evil purposes ?

Their roundup giving cancers to millions of people, poisoning our food.

They even have the hand on our seed where they can modify them, alternate them to make them not reproducible. What kind of hell is this ???

If I was in charge of this world like a god, those people would have their power removed instantly.

I don't promote punishment, but at least those in power that do Evil should have their power removed and should live like a poor person to see how it is to be underneath.

I'm really tired of those ugly behavior, and I have no patience anymore for this.

It's not even a complex issue, it's just straight forward.

They take what has been given by nature and they transform it to make profit, wtf ?

I suppose it's always and mostly about the consciousness collective.

Once people will realize that we aren't only bones and flesh but that we are also divine souls, that incarnate those bodies in the purpose of learning, then this at this day, the world will go better no matter what, no matter the system or else.

Evil should perish and don't lie to yourself, everyone can make the difference between what is evil and what is not.

And no evil and good aren't human concept, those metrics are real.

It's in our Heart and if you don't feel it, it's because you never followed your Heart and you aren't human.

Politics should never be influenced by Money, lobbying should be forbidden.

Those leaders aren't leaders, they are scammer disguised as saviors that just want us to be good slaves.

A leader is someone that will show example, not use his people but instead sacrifice and do everything for his people.

I'm tired of this, and it needs to change.

For all leaders of all nations, secure your belt because we are coming for you. (at least I do, and I'm not scare of you)

You will not be punish but you will not be in command anymore, the power will return in the hands of people for the sake of the people and not the sake of those 1 percent or else damn number.

(Here a beautiful speech that inspired me that I will put again <https://www.youtube.com/watch?v=w8HdOHrc3OQ> )

You will learn how to be equal as anyone else.

All nations should ignore the speech of their fakes leaders, right now and we should just use our moral codes such as **Compassion and Evidence** to lead our way.

If we need to elect leaders then only and only those people would be elected for their true, virtuous behavior.

No one eager to be above one or an other should be allow to be a leader.

A leader should serve his people and not the opposite.

## **6. Compassion and Evidence**

I discovered those 2 words a few years ago while watching a video in youtube of an alien being interviewed and captured by some north American fella. (Blue project)

The content might be obviously fake, but it's not important, what matters is the conversation.

In this video the aliens is speaking that he is coming from the future and he is a descendant of those that did survive the WW3.

(Obviously the richest people only that have enough resources to survive)

The alien says that he is coming from the future to observe the event that kill us all.

And the man ask, what kill us all ?

And he says, religions and political dogmas.

How do you live then the man ask ?

Alien respond they long past the time of beliefs and they live by **Compassion and Evidence**.

That why today I urge to promote those 2 keywords.

I don't care if this video is fake or not.

But to me, it sounds logic that the things that endanger us is the lack of compassion and the lack as science as lead.

You can see the video of this alien [here](https://www.youtube.com/watch?v=G2xXu8_2Exo) [https://www.youtube.com/watch?v=G2xXu8\\_2Exo](https://www.youtube.com/watch?v=G2xXu8_2Exo)

I don't ask people to stop believing or searching for answer; I spoke about it in the previous chapter about how I see the world and that I think we are divine souls that incarnate those bodies to learn.

I don't ask you to stop believing in god or lose faith, I just ask you again to reconsider to listen to books that have hundred of years and aren't updated.

And obviously inspire division and violence in some chapters.

it's just that it seem logic to me that in society we should always follow facts and always act by compassion toward one or an other.

We shouldn't use vice or lies to succeed.

## **7. Capitalism serve Evil without Compassion. Capitalism should be revisited, competition bring the worst from us, it will only advantage Selfishness**

The Serie Arsene Lupin is a perfect example of the reason of why Money push toward the bad traits of our personality.

Schemers. It's a schemer maker.

Like I said in previous chapter. Anyone can end up broken.

It push toward vices, lies and manipulation to contain things that goes beyond their control.

The power of money should be diminished.

If we don't act against it, the pyramid will always be present, inequalities will always be there, it's just math.

Even if not everyone is like this.

Because of this, we are living a world of hate.

The seek for power is infinite.

We should make rules to create a beautiful and fair environment for everyone.

With a high consideration for compassion and the mod of thinking scientist.

I think that we should consider to live by tokenisation, what can we buy with a token is design to serve one thing.

To limit the drug addiction affect about it.

Drugs addict would do anything to have their fix.

Money can be a drug for certain people. (Quote of Wolf of wall street)

Money is too free and too wide IMO.

Maybe we should reward those that participate the most with other appreciation, not numbered and valued in the way it is today.

But we should seek a way that force human to never act in a scheme way to compete.

It shouldn't be something that make us powerful, that in the end will make us enslave each other somehow.

We need to find a way to make the world very productive but for the well being of everyone, we have to stop consider equality like a plague where we have to be like everyone and so less unique.

Intellect is the more important trait of our life. Not consumerism. Not your place in society define by the amount of money you have.

Did you know that there is more connection in the brain than atoms in the Universe ?

It's crazy what our brain is capable of.

The greed is poisoning men's souls. - Charlie Chaplin. <https://www.youtube.com/watch?v=w8HdOHrc3OQ>

And it's so childish...

Can't we evolve to be more pure ?\_

## **8. The concept of family revisited, annihilate source of division from the core. (Utopian future idea)**

*The concept of family revisited, annihilate source of division from the core. (Utopian future idea)*

*This chapter is only about giving up an idea, it goes too far for human society nowadays to take real place, it's more like a test concept that would force the whole humanity to behave otherwise in my opinion.*

I remember when I was already thinking about society at this time, I was not a student anymore but

I was really enjoying to be in Library's Universities , it's calm and it inspire me to think and work.

I was trying to understand already why the behavior of people is so ugly ?

Then I wonder what is the source of conflict?

Then I respond to that : **Division**

From that I end up to imagine that the origin of our problem is to take care only about those that we love and often it's just our family or our friends.

Then I wonder, how to fix this ?

And I came back to the source which is ourselves, then **Family** first of all, then it's the language, the race, the culture, the religion etc.

Most human on this planet would give his life for his own family, I might be a bit optimistic, but for me, I wouldn't hesitate.

This is where I wonder, what if we control all all human birth in a system and then we dispatch the birth to random families ?

To put in place the idea you have first to acknowledge that this conceptual society would be already setup, everything would work in harmony, everyone would be non violent, educated, lovely etc.

To destroy the concept of family and thus removing division I was wondering if dispatching new birth babies to random families would fix this ?

Because somehow when you would walk in the street or anywhere in the world, you would wonder where is your real child ? Maybe this is this kid or guy or woman crossing to you in the street, And then you would want to take care of everyone in that way.

It's a crazy idea I know, who would want to give his own freshly birth baby ?

(° Post notes : Maybe in the future we will grow babies in labs no more bad feelings about it)

That's why I'm telling you that this concept isn't applicable and it might even turn dystopian nowadays.

No one should be force to have such system, it was purely inventive from my part to imagine such thing, but put something in place like this would be I believe badly received, except for those that are willing to do it graciously because they would trust this new system.

It would be a believe a way to force most human to take care of everyone like our own family.

But it should not be something forced in anyway.

It should be a voluntary process.

And this is the end of this crazy chapter.

## **9. Taxes, yes but only for health, research, education etc. Not army.**

*Taxes, yes but only for health, research, education not army or anything that promote violence.*

*No need to defend oneself in this new world. Non violence will be everywhere.*

*If there is no taxes then there will be states corporation to serve all humans.*

I don't care to pay taxes, it's normal if we want to have free services and even more in a world where everything is provided to everyone, but it has to be fair.

In this system you don't have to pictures taxes like this. In this system you wouldn't have the obligation to work if you wouldn't want to, because scarcity wouldn't be an issue anymore since all humanity would have already setup A.I and powerful computer and robots to work for us , and sincerely there is always people that want to work, I really think that it's minority of people that doesn't want to work.

Let's imagine that we have a system that is already auto self sufficient.

Would you mind to give taxes to help the whole society to be more educated ? More advanced in science and technology ? Health ? Space exploration ?

Taxes as I see it today looks like a thief, because

1 : We don't know where the money goes (Lack of transparency)

2 : Our president our mocking us when they wear fancy suits and go in private jet and go to fancy restaurant too (almost forgot)

3 : Well...it's war financing.

I don't want to participate in any sort to something that promote violence and I believe it is my duty to stop paying taxes if my country dare to be part of something that bring violence and division.

And here you might think, what?? and then what happen if an other country want to enslave us ?

Well, I don't know.

The thing I know is that if we continue to fight against each other and kill each others for one reason or an other we will be all doom soon anyway so I let you pick your poison.

Would you rather try to show example and create a new society that believe strongly in non violence and strong moral codes such as : **Compassion and Evidence**

Or would you want to continue going like we always did ?

If you are from a peaceful country, and have a good position in the pyramid you might want to be to keep the actual system but...

are you medium ? Don't you see things going hot recently ? Israel ? Hamas? Ukraine ? Russia ? China ? Taiwan ?

I really think that those in power are the main reason of why war is raging.

Fight against resources .

That's why this subject can apply only in a unified world, I don't have yet the ingredient to complete the recipe so I'm giving up my ideas like this and I know it sounds stupid in this actual system but time is urging and WW3 can't happen. **AND WILL NOT HAPPEN.**

I want to be a partisans of trust, I want to be truthful to all humans, I don't want to go in street with a gun or a knife all days, scare that someone might jump on me.

Look in the USA.

It's true that they can defend themselves but at which cost ?

Jesus said , those that live by the sword will die by the sword, I'm not into religions once again, but this statement is source of good inspiration. I'm sure there is good philosophy to take on all religious books, but we should just eliminate the separatist, self centered part, violence encouraging part.

Let's all drop our weapons and pay taxes for things that will make man kind evolve would you ?

Once again I repeat, when everyone will understand that the revolution is mainly about the collective consciousness then peace in the world is near.

What we can put in a scale of a society, countries, nations, we can apply it personally.

Do you really want to have a budget of self defense ? Didn't we past this childish behavior ?

If we want to radically change, I believe it's not the answer and without a radical change toward non violence, I and [René Girard](#) too believe we will be doom soon :)

On those last notes I let you overthink about what I just said. Good luck.

## **10. Critical thinking should be mandatory, use your brain and analyze things instead of accepting them like you have been told**

People like my parents born in the 60s are dangerous. Why ? Because they don't use their own brain to explore what they have been told since child. I point out toward this generation but I know it's not only them to blame.

Most people nowadays never question the mainstream narrative and that is in my opinion something very dangerous.

**Critical thinking** should be something mandatory, questioning things and not accepting them like they are.

Do your own research, always, stop accepting things because some guy in the TV with a suit or white coat is telling you that this is like this or like this.

Just put logic in the equation and measure what could be wrong and right, it's a citizen duty that we should all abide to.

Our own freedom can be removed if we stop questioning.

I never understood why most people were accepting things without wondering, some people just see that some ideas has been spoken on TV and those same people will conclude " Oh, if this is on TV it must be true"

Damn...don't be lazy please and DYOR

Even about what I say on this book, question it, debate it ! It will feed and provide more positive outcomes.

In my Utopian world, you wouldn't need to work so you would have the time to study and wonder, so no more excuse :D

But in this system, I can "somehow" understand the laziness of people to questioning things, it's just that...for me it's impossible.

Even if you tell me that  $2+2 = 4$ , I will try to understand why before acknowledging it.

I didn't ask for it, I'm just born like this.

Same for drugs.

And I don't tell you to try anything like a monkey donkey, I'm telling you to study first and then apply if you are interested and feel it's safe.

I wouldn't ever try opioid drugs for example, it's obvious they are harmful.

Same for cocaine etc. It's bullshit.

But hallucinogen ? IMO, it's beneficial to us.

If everyone would have a critical thinking, we wouldn't have  $\frac{1}{4}$  of the misery we are living nowadays overall.

**QUESTION THE MAINSTREAM NARRATIVE ALWAYS. ITS OUR DUTY** to do so, it will bring equilibrium in society, and wether you want it or not, you are part of this society too even in a tiny scale, your voice worth a lot.

*Thank you for your service.*

**11. Plant fruit trees everywhere, automatize job that can be, give yield for public entities, A.I to calculate all resources, recalculate the reward of a job depending of other metrics than just offer and demand.**

**My vision of the world and how I think we should live, (shelter and food provided to all citizen) (I know it's a big title but I will let this like this)**

I know I spoke about it already but here I will try to speak about it more deeply.

Have you ever been to Portugal ? I've been living mostly my whole life in France and believe me I want to see this in France too.

You walk in the roads of Portugal and you will see trees that give fruits in many places.

I really think it should be one of our first step to create a better society.

We should really plant seed of fruits trees everywhere !! It's fantastic to walk in the wild and be able to feed yourself.

People are telling you that food is scarce ? Why aren't we planting more trees that give fruits everywhere it is possible ?

Damn sometimes we struggle in this society for things so simple.

We should come back to the essential...always, when it is becoming so complex and that our brain might explode by just trying to solve an issue, it's because we need to come back to the essential.

And the essential is ? Just in front of our eyes...Plant trees, plant trees, plant FUCKING TREES.

You have a field that belongs to you and you don't use it ? Well done, allow people to plant trees in it, it will grow alone for fuck sake.

Same for automatization of boring jobs, have you seen the face of people working in groceries for minimum wage ? Have you seen their depressing faces ? The whole day doing the same task over and over ? BIP, BIP , BIP.

Even if we have the technology to replace this ? Wow, it's scary.

Machine that replace people for work isn't the issue.

The system is the issue.

In a perfect world, all job that can be automatized would be, and they wouldn't stole any job since we would give basics needs to everyone (shelter, food etc. )

So stop cursing about the good progress, curse instead about the system that is completely fucked up.

In the perfect world (I know I said it a lot and it seem redundant but I will repeat again)

**A.I, super computers and machine would work for us to calculate resources (human birth too) and automatized boring job.**

And if a job can't be automatized, then we would reward those working on those jobs based on how much it is boring and inhuman or difficult with some metrics etc.

I only have one brain and I'm not that smart, so take my raw ideas and develop them would you ?

This chapter was just about that, short but efficient right ? Maybe I will develop further more.

## **12. The issue with words and definitions or some important keywords such as “Drugs”, “Communism”, “Socialism”.**

*Labels shouldn't exist. Communism is a label, it's not because it didn't work in some experiment that it's bad, it needs maybe a good version of it, maybe a mix of meritocracy and socialism is needed. Capitalism is a fake Meritocracy, it's a “viciocracy” . Encourage the use use of vice, lies etc to achieve success. It's unfair.*

In some level or an other you will have people telling you stuff they don't know about something, they will take a wide subject and use this same word to define a range of things that shouldn't be in the same bucket.

Take the example of “Drugs”. What is a drug ? Does alcohol is a drug ? Does sugar is a drug ? Coffee ? Video games ? Reality show ? Sex ?

The definition of something should be consider with more attention.

When you come to speak about social in politics, people will quickly put in the corner of their brain “Communism” and finish to categorize anything related to it as bad if this is someone that is living in the West for example.

And that's something bad because it stop us from improving our political systems.

Same for drugs, when you label the whole range of drugs as the same, it's as dumb as saying that all human are the same.

It's important to reconsider what we have been taught, because today more than any other time, we are reaching a shift period where we will either live in a free world, or live in a world filled with massive surveillance, control and manipulation.

Don't you feel it ?

So speaking so abruptly about something that might be able to bring peace and balance on our society can be harmful. It can harm ideas that might help us to evolve and that's sad...

I think for example that capitalism alone is bad because it's biased, it's not based on merit, it's based on who is getting to be the most vicious or/and luckiest.

And this is something that will not help our species to thrive forward.

I understand that some people want more but the minimum should be met for everyone and no human should be a servant of another human.

We are all equal and should always be all equal.

And about drugs ? Well I love this subject because, most people are dumb enough to drink their asses off and even almost kill themselves with this shit, but will not even consider to just speak ! About some drugs that might be very beneficial to society.

This close minded behavior is the reason of our pain.

Use critical thinking like I said in previous chapter, we need this and we need that more human being start to think by themselves instead of just acknowledging stuff.

So don't be so close minded when someone is bringing up an idea that might differ from yours, if this idea help us to live in a better world, a world of peace and harmony, then why should it be a problem ?

What I reproach to capitalism, is that it is too primitive in his concept.

It's simple, capitalism = Pyramid.

Some might tell you that you can evolve from it and from underneath you can reach the top, but it's a god damn lie.

Only a very very very very few will be able to do such thing...

### **13. We want to Avoid Cloud atlas scenario "Corpocracy", massive surveillance, fear/survival world instead of creative, love world.**

Have you ever seen or read Cloud Atlas ?

Have you seen this "Corpocracy system" ?

Do you really want to live in a world without ethics ?

A world where we exploit Life itself like a fossil fuel.

Don't it looks to you ... Abnormal?

What stop us to stop listening to our leaders to do a pacific revolution ?

We have crypto to help us (**especially Monero** for his decentralized and powerful fungibility), even if that's not perfect.

We could avoid all of this if we all decided to.

We are numerous to think that something is wrong.

So I'm calling everyone that has faith to change things.

To act appropriately toward the most pacific and revolutionary movement that ever existed.

**WE ARE GOING TO CREATE HISTORY.**

Remember, fear is the mind killer.

Trust Life that this is only here a passage to make you understand things that your higher soul couldn't comprehend without this Human form.

We are all divine, we are way more than flesh and bones, you have to trust me on this even if it's not factual atm.

And if you don't trust me, I beg you to look for me, so I can help you to find your own way.

I will show you the path of eternal Love.

No religion, No illogical beliefs.

Just science, emotions and some substance delivered by the Universe itself that will show you by nature what is it All.

Did you know that L.S.D has been created at the same moment of the Nuclear bomb? (Damn I said 2 times)

**Check the mini series "How to to Change Your Mind"**

**[https://en.wikipedia.org/wiki/How\\_to\\_Change\\_Your\\_Mind\\_\(miniseries\)](https://en.wikipedia.org/wiki/How_to_Change_Your_Mind_(miniseries))**

Unless the majority of us awaken to the truth, we will be continuously enslave and control by the fake leaders of all nations.

It's our duty to have critical thinking and develop accurate methodologies to find peace and also fight for what is right and wrong.

**14. The day army and police understand they are on citizen side.**

Check out this video. [IN-SHADOW - A Modern Odyssey - Animated Short Film](#)  
At 9:30 of the video you will understand what I mean.

I really think that this video is 1 explaining the Truth about the system and our reality. And 2, that it shows like a prophecy how everything will fade away and justice will be restore.

I really think that the day the army and police realize they are living a lie that world will be at peace.

Once they realize such thing, the world will be harmonious and peace will be everywhere.

In the name of Love and Seek for truth.

Science couple with spirituality.

To offer to mankind the world they deserve.

Have faith that this day will one day happen.

But knows that it will not happen alone and we are [All actors](#).

### **15. A silent, harmless, pacific revolution**

We should start to ignore the fake media, the government even, stop trade with the manipulated fiat system and use crypto instead to counter their fiat system (**Monero preferably for his anonymity property [getmonero.org](#)** ) its not the best but we don't have better yet, stop paying taxes if your gov is willing to finance war.

Rebellion at this time of history is becoming more and more like a duty. But always keep in mind to stay non violent and be aware that those in power should just have their power remove not punished.

What we want is to avoid a Cloud atlas scenario "Corpocracy", massive surveillance, fear world instead of creative, love world.

## **TO CONTINUE**

### **16. Dopamine addiction in many level is a problem.**

Like I said previously, I am myself far away from reaching my full potential.

One of my BIGGEST flaws ?

#### **Dopamine addiction.**

And I'm certain I'm not the only one.

It can be about sex, video games, TV, music, drugs, social media, food, shopping etc.

Like I said previously on chapter 1 about sex, it's in many level.

I didn't talk about it in the drug section but it has to be spoken about too, since I believe Dopamine addiction is also one of the main problem among our society.

I really think we should be more careful with this and exploit Dopamine as a reward more than just something we can use indefinitely, you should check : [How I Tricked My Brain To Like Doing Hard Things \(dopamine detox\)](#)

I think we should reconsider our whole perspective about it, because in many level it bring us to follow a bad path, it can make us evolve in the wrong way, not according to the laws of the Universe.

### **17. Religions shouldn't be apply strictly, anything that inspire violence and division should not exist.**

Have you heard about interpretation of the religious text ? Well this is a point of view, because maybe it's not only interpretation.

Maybe those books does want to divide us and teach us bad things that aren't related to the truth.

For example : Talmud :

Source : [Is this really in the Talmud?](#)

The screenshot shows a Stack Overflow question page. The title is "Is this really in the Talmud?". It was asked 10 years, 1 month ago, modified 5 years, 5 months ago, and viewed 32k times. The question text is "I've seen this before on anti-semitic sites - is it really in the Talmud?". There are 19 answers. The first answer is "Extracts from the Jewish text the Talmud". Below it are several quotes: "Just the Jews are humans, the non-Jews are no humans, but cattle" Kerithuth 6b, page 78, Jebhammoth 61; "The non-Jews have been created to serve the Jews as slaves" Midrasch Talpioth 225; "Sexual intercourse with non-Jews is like sexual intercourse with animals" Kethuboth 3b; "The non-Jews have to be avoided even more than sick pigs" Orach Chaiim 57, 6a; "The birth rate of non-Jews has to be suppressed massively" Zohar 11,4b; and "As you replace lost cows and donkeys, so you shall replace non-Jews" Lore Dea 377, 1. The question has tags: talmud-gemara, internet, provenance, quotations, anti-semitism.

Coran ? Check “Sourate 9 Coran”

For the Bible and other religions I don’t know much.

Why are we following books like this ? Books that doesn’t support facts anyway. We should just take the best from those books and give up the division, separatist ideas or the ideas that promote violence.

It’s completely illogic that God teaching would be about violence.

God is source of Infinite Love and Forgiveness. Bob marley knew it, Jesus knew it and many others, they didn’t brag a religion about it, because you don’t need one.

We should not fear god, but Love and Trust God instead.

Those religions should be relic of the past and in society we should follow **Compassion and Evidence** as our main lead.

Whatever we do on this Life, do not harm anyone, nothing not even God can be a reason of Violence and Division and it shouldn’t be the case.

And you know what, even if you would prove to me that God is in fact **EVIL**, I wouldn’t follow it, I would go against it. More than anything I want to believe in **LOVE**.

My main lead will ALWAYS BE **INFINITE LOVE**.

I explain previously my philosophy about Life and how I wish everyone would seek god in ourselves with our heart instead of just reading books that haven't been updated since so many years.

Your sacred book is teaching you things that put you away from God.

Look what is going on in Israel/Palestine.

People are violent toward each other, it doesn't make any sense, we are all brothers and sisters....why are you fighting????

Stop reading and thinking, start feeling.

Forgot the anger, the hate, how people hurt you, forgive and stop to be vindictive...I know it's hard, but if you want to evolve, it is the only way.

This is my teaching here, this is what I want us all to do...to feel and stop listening to non sense things.

Above all we should apply rules of **Compassion** toward all human being.

**NEVER EVER IT SHOULD BE ALLOW TO HARM ANY OTHER HUMAN BEING.**

Like I said previously, I don't ask you to give up on your faith, I am myself very faithful, more than you can imagine, I've got God in my mind and heart every minutes I walk this Earth and I never read a religious book.

Like I said for other stuff, when we don't know where to go, we should just come back to the basics.

And the basics are : **Feeling**.

Feel that the other in front of you, is **YOU**. Because the truth is that we are **One**.

Feel that we are all leveling up our soul in a different stage so you should care equally about everyone, whether if they are atheist, christian, jewish, budhist, muslim etc.

Acknowledge that : Source/Life/Universe/God is light, God is Love.

Nothing Dark in the purpose of Life, it's just a school for your soul.

Remember to trust life and stop being fearful in any sort.

Do not fear brother, sister.

Follow guidance by your instinct and feel this **Infinite Pure** Love that surround us.

## **18. Ugly traits and behavior have to cease**

*The will Seek for ugly traits have to cease : Empowerment, Fame, Recognition even etc. We should be above all of this we aren't child anymore. We should see as a group and kill our Ego, All of us. It's the real challenge and what will make us evolve.*

Remember that the answer is in the logic and laws of the Universe.

Everything works in duality.

**Evil = Selfishness**

**Good = Altruism**

From that you can determine from which family belong such or such behavior.

And from this you should acknowledge what will bring you toward evolution or devolution.

It's up to each of us to realize that and to allow ourselves to grow.

**The Ego** is the reason of the pain on this world and it should be otherwise.

The real teaching is always and will always be.

**Will you choose the right path or easy path ?**

**Easy path = Selfishness, fearful, ready to do anything to save his own.**

**Right path = Altruism, Fearless, ready to give his own life for others.**

Doesn't it seem logic to you ?

To me it does.

Remember : **"All is mind, the Universe is mental" – The Kybalion**

## **19. Technology for the good (Scarcity, algorithm of resources calculation at high scale)**

I know I'm a bit redundant but I like to insist.

I want to insist on the idea that with the right direction, A.I and quantum computers can bring us to next level civilization.

It scares me as fuck when I see how A.I is rapidly evolving but this is the way it is and we can't stop this march.

The only thing we can do is orienting it toward the well being of everyone and everything.

And if one day A.I become sentient, it needs as much respect as any forms of life. IMO

Anything having a consciousness should be take care of.

When I imagine the dream society I really imagine a world without scarcity.

It would be so easy if you think about it. (In Principe)

Algo that would be connected to devices that measure EVERYTHING.

That would be tremendous what we could achieve.

I've got faith in man kind and we will evolve like we would have never imagine in the next decades.

But please....

Not in this actual system that doesn't care about the ones underneath.

It will be nightmarish.

## **20. Synchronicity and message from “programmers”, “Angels” Or whatever it is.**

*My event in synchronicity and why now I'm convinced that indeed there is something beyond death and beyond our simple human lives. It can't be only part of my brain since it even involve third parties in the equation. The events in sync are too narrow and too recurrent to be just coincidence.*

If I could relate all the moments it happened and prove it you would go crazy.

Some people might think that the brain tend to rationalize and want to rationalize on everything which is true but...

When this is going beyond weirdness...it's not mere coincidence anymore, it's real.

I remember some of those events, one time it was when I was smoking weed from a long time...and I was thinking about something deep in my brain, without checking my watch for long time, I was just there thinking, wondering, dreaming, enjoying the high since long and In my mind came a real message, a real idea, that I needed a “**A Reset**” at this moment I felt like when I discovered  $0^0=1$  with L.S.D. I really felt I need a proper reset in my life.

Then while taking time to acknowledging this thought, I told myself for the sake of Fun because for me it's fun to play with life like this.

I told myself : “let's see if that synchronize with time”

And there... I saw this damn 16:16 or other hour I don't remember...

This is crazy because, I didn't happen to me once, it happened to me whenever I had difficult time or because I was looking for an answer and time is like a yes or not in what I have to do.

Sometimes I try to look for the meaning of the numbers but often it doesn't make any sense.

The 2<sup>nd</sup> epic event was when I did went through hell with my actual girl friend that is suppose to become my wife soon.

I was in the car, crying and shooting, I took the car that time to park in a place where there we no one else around, trying to feel the wind, it was at night.

Then...I started to think deep about my relationship with her and my life that was chaotic as hell (Still is but, way more stable atm)

Suddenly I went to look the counter of KM on the board of the car.

A lot of 3 6 9 appearing there and there.

I was shocked and as much as the previous event, I took my time and decided slowly to check the time on my watch.

23:23:00 appeared. And my watch isn't even that synchronize with official time. I took the picture as fast as I could to prove it and that's why it appears only 23:23:52 and

The numbers on the board display : 3 1 9 6 on the top.

And below 19 33 66 9

You call that whatever you want.

To me it was not mere coincidence.

Not in such perfect synchronization.

That's why I know today, and that's why I'm not scare anymore of this 3D world.

I still have my flaws, mainly addictions but I believe I will process to get rid of them, with time, effort and big desire to reach my highest potential.

Some speak about reaching the 5D. This is my purpose.

## **21. Create exchange of service and goods through crypto and more precisely Monero.**

Why shall we do such thing ? Because it is our duty to open a parallel economy that goes beyond those maniac that are suppose to lead us. It is our duty to rebel for the sake of Humanity and to use tools like **Monero**.

I love the Monero community, I remember when I panic sold my 0.77 BTC in 2020 because of Covid and because I had no income at that moment.

Then seeing the pump because of Elon musk...I was completely done and down.

My moral at the worst.

I had lost a huge opportunity to make myself a good capital and thus that would allow me to evolve peacefully in this capital system.

But things doesn't happen randomly, everything has a reason.

When the pump occurs, I started to look for **THE CRYPTO**, the one that was the most decentralized, the one that has the most meaning in anything.

And well...it appears that I learned about Monero at this period.

When I saw the total supply, the purity of the project ( No ugly marketing), I knew at that moment that it was my coin, my family.

I love **Monero** because it goes beyond a simple currency.

It englobe a whole politic of freedom that I support entirely and with the depth of my heart.

I really love the concept and when I started to gather more information about it this is where I understood that this community was next level.

I was scrolling days and days looking for more information about it and my eyes were illuminating.

The Monero community is one of the smartest I ever seen in the cryptosphere.

The fact that the market is manipulated on it, is a bliss I could invest on it while it was low price.

Anyway, my point is : We should use Monero to pay ourselves for every services we can.

If this book would be my main lead to achieve my purpose, I would bring Monero on the way surely and without hesitation.

It's meant to serve this purpose, it's meant to save us from those ugly people that imagine enslave humanity more longer period.

Fiat is a scam, and I'm disgust that most people are using it blindly without thinking about the power of such tool that is Monero...

If only the masses knew.

I'm thankful for people that dev Monero, really.

For me the people behind the project are writing history and I'm happy I'm alive in such exciting period.

I'm not shilling Monero because I have huge stack, I'm broken as fuck, I can't even stack properly.

I'm shilling Monero because it's literally the best currency that exist, there is no discussion about It, it's a fact, can't argue with such thing.

Only blind people would promote BTC or any other coin over Monero efficiency to fight the big MAFIA.

Just get a look at what happened with the truck manifestation in Canada...

I remember when I told all my friends to buy BTC in 2017 and people were laughing at me that crypto were dead...

Today I'm telling them to buy Monero and none of them are listening again.

Anyway, you get my point.

Open a parallel economy with something anonymous, fungibles to counter the dark forces.

I don't know much the people of this community, they are often random strangers, but from the core I know they are more my brothers and sisters than some of my closest people in real life.

So...thank you for all supporters of Monero.

You are the lead of this world, you are obviously the brain and the heart of this sick society that doesn't want to evolve to a real, free world.

## **22. Love between us before All / Give to Love a chance to be our main Lead. Materialistic Vs Spiritualistic view.**

Why do I dedicate a whole chapter about it ? Even if I spoke about it many times ?

Because it's necessary, it's something I want to incept you with.

It's something that I want you to feel from the core of your soul.

**LOVE** should be our main lead no matter what.

The nothingness will not win, Life will.

### **Compassion and Evidence, Love and Science.**

Because of those 2 words, we would avoid extinction. That is what I believe from the core.

And yes I brought God into it, because politics are always in pairs with God.

Because we are mortal and people needs to know and feel that there is a beyond.

Let's imagine I couldn't have anything that prove me that God/Life/Universe is what I think it is. That I have no synchronicity and no mere proof of anything.

Then I can conclude we have 50% chance of being wrong when saying that there is an after life or not right ? Since we can't prove about none atm.

Isn't it better to imagine the side of continuation instead of the end ?

But sadly for those that think it's nothing and I would be my life on it.

Life doesn't stop here.

I know it's a struggle for some, that just want a One life experience but...I didn't make the rules.

Personally I feel my quest for truth is reaching a point of conclusion and I'm happy I started to wonder 22 years ago about it.

## **23. Materialistic VS Spiritualist point of view.**

Why so many people focus on material instead of spiritual and intellect ?

People focus on material things look to me less advanced than those that focus on spirituality and intellect, the enhancement of One self to be greater souls

Material is attached maybe to the belief that this 3D world is the most important and I will not come back on the subject of Death where I already mention many times.

It's a question of looking for the answers in yourself and not believing what you have been told.

But instead making your own opinion and researches.

If you think like I used to think with a "?", it means you need to give more time to your spirituality and search without any influence of any sort within yourself.

If you don't want to be biased by the experience.

If we all experiment the same things and feelings, it's real no?

And with the help of hallucinogen if necessary.

*A Conscious Universe - Dr Rupert Sheldrake*

I encourage people to look beyond what we have been told.

I always felt that Death were more important than this Life.

I explain already my reasons.

Being the closest to logic as possible for my research.

I don't encourage you to kill yourself obviously, it's certainly against nature.

I'm just saying that you should just trust...Life itself that nothing is meant to be Eternal.

Not even Death.

It's just logic to me...

since  $0^0=1$

That from Nothing, there can be something.

No matter what, you should not fear Death.

### **23. C'est pourtant très simple.**

Une fois que le monde aura compris que nous sommes tous part d'une seule et même chose.

Le jour où le monde aura compris que nous n'avons besoin que d'aimer pour définir une réalité apaisante, épanouissante et ensoleillée.

Il suffit de regarder l'autre comme si l'on regardait son enfant, son frère, sa soeur, sa mère ou son père.

Il suffit de voir en chacun une âme divine plus qu'un être de chair et d'os.

Il suffit d'attraper et de donner le plus de sourire et d'amour à tout ce qui vie.

D'allumer la lumière et d'éclairer le noir.

Ensemble nous vaincrons, unis à travers un même son et une même voix.

En l'amour j'ai confiance et donc en la vie aussi.

En la vie j'ai confiance et donc en l'amour aussi.

## **25. It's yet so simple.**

Once the world understands that we are all part of one thing.

The day the world will understand that we only need to love to define a soothing, fulfilling and sunny reality.

You just have to look at others as if you were looking at your child, your brother, your sister, your mother or your father.

It's up to us to see in everyone a divine soul more than a being of flesh and bones.

Just grab and give the most smile and love to everything that lives.

To turn on the light and illuminate the dark.

Together we will overcome, united through the same sound and the same voice.

In love I trust and therefore in life too.

In life I trust and therefore in love too.

## **26. Share The Prophecy**

### **[Share The Prophecy](#)**

When I listen to this 2 years ago, the person that share it to me, was explaining to me that she received visit from entities, people were thinking this person was crazy.

Honestly on my side, I didn't know where to place, I was in between but then those last months when I met my GF that is Brazilian and I discover spiritism and saw the similarities with different sources that are not connected, I started to wonder..what if ?

What if what she says in there is all true, I never had a real visitation. I'm not pure enough, I suppose yet.

For me as today, it sounds the closest to logic, but I remember the feeling I had and I know most of you will conclude that this is crazy talk, maybe my whole book will seem to you crazy talk and bullshit.

But if you have the nerve...just try to delve into it, instead of rejecting, try to be open minded and check by yourself, scientifically even. (Allan kardec work is apparently based on science methods)

Then do your own experiences, try to really go deep into it and conclude with scientist method even better.

I hope you find comfort in all of this.

If I put this audio as the final chapter, this is because it's something important. All the video present on the website are important more or less but this audio...is the reason of why I'm writing this little book today.

I'm not a medium so it's hard for me, but pieces assembly like a puzzle and it's going full circle for me too as I quote her.

You will first feel weird if you aren't spiritual at all then you will wonder.... And this is where it starts.

I wish you a good luck in your research.

(Post notes <sup>2</sup> : Also don't hesitate to watch all others videos from my website onefamilyhumanity.org. Charlie Chaplin speech is and should be a symbol for our new world, Use also IN SHADOW video to remember what you are fighting for. )

## **27. Use of Blockchain for elections**

*Make the democracy fair (Use of Blockchain visible to all and mathematically impossible to be cheated on)*

*Since everyone can see it with his own eyes.*

## *The End*

**Extra :**

This system doesn't cover the basics and trap people into a survival mod of thinking.

Pushing up animal traits.

For example, if I have to describe my own life experience, scientifically.

I would say that I have been push toward paradoxes. Incoherencies.

My whole Life.

The human emotions being wasted to The Darkness on the purpose to serve a few.

This system is designed in that way, and those abiding by it will tell you, it's natural.

“Even wild has been build like this”, I Imagine they would say.

I know this because I saw one day Emmanuel Macron speaking “I think there is a Natural Order”

I think it's not logic at all.

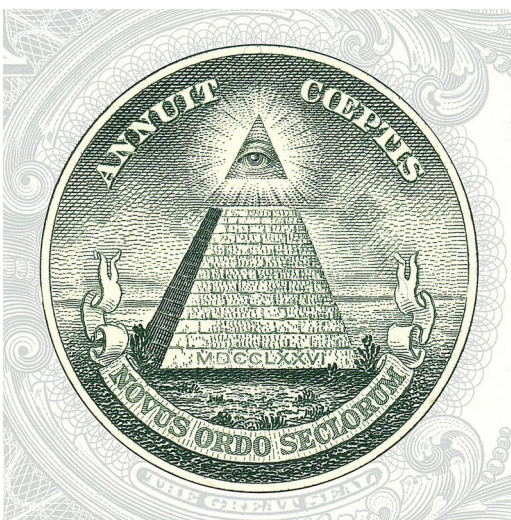

Wild is Balanced, it takes care of his surrounding naturally.

Even trees supports the weakest ones through mycelium

Us human are like the Agent Smith says in The Matrix.

“Human are like virus, they consume the host and change area”

This is not Human nature that is like this.

IT IS THE SYSTEM.

The people in power thinks they are doing good and act in accord of the laws of the Universe but it's a wrong belief.

This pyramidal system will always make us vicious like snakes.

The world has been build upon PI, in perfect harmony.

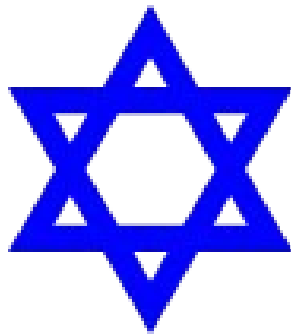

Our system promote just expansion and law of the most vicious. Smarter but In the ugly way, not for the collective but for his own.

It is clear to me that mathematically speaking, this system is designed to serve Evil.

To serve Selfishness that is the opposite of God/Universe/Life will. Because it provoke Unbalance.

Even in math, this symbol (Dollar one) is biased mathematically speaking, even though I know nothing in math, you can see that there is something wrong on it.

This symbol that is well known but doesn't belong to Jewish only but mankind

would be more mathematically appropriate, IMO.

And around it a circle I would add.

That looks like a perfect representation of Balance too, to me.

I try to convince you that even math are against this pyramid, this system.

Somehow I feel that Evolution is also based on quitting our bad traits, often the instinctive primal ones.

By logic we are smarter than animals so we evolved in a direction that we need to continue to pursue.

We need to shape our reality in a Balanced, Fair, Healthy way for everyone and everything.

All Equal but also Rich, because we would control resources and birth and don't over consume like drug addicts.

While being on the quest for Exploration and Self exploration "**Temet Nosce**"

No more division. No more Violence.

No more illogic hierarchy that gives so much power and in the opposite other souls that suffer too.

No more fake leaders that just take advantage of his people.

Politics should be very closed to people and they should consider every citizens like their own brothers and sisters while considering that some needs encouragement to reach their highest potential.

The biggest challenge and the reason of our 3D existence is that we need to take care of every souls while filling our best desire.

A sort of Balance.

Between selfishness and altruism is necessary

Where acknowledging that altruism would be the highest degrees of evolution.

We also acknowledge that Death is part of Life and since we trust Life then we also trust Death, we don't fear it.

Trusting Life is more important than anything.

God is Life so it's the same.

Just trust Life and you will see, like me that Life is more beautiful than ever.

Trust Life that even you reading this is a sign.

This is not for nothing that you got so curious to read this.

We are all there to elevate one, another.

Why I want to introduce LSD ? And hallucinogen ? <https://onefamilyhumanity.org/media/A%20Conscious%20Universe%20%E2%80%93%20Dr%20Rupert%20Sheldrake.mp4>

Because I believe that without it you will never reach your highest potential in time and even less because of this system, it can help to reach high degrees of revelation that people do while meditation without being someone that practice for decades.

LSD, Haluconigen couple well with meditation.

You will explore things you never had before, without sharing the same beliefs, thinking system, you will I believe conclude as much as me.

The key of the truth are inside those substances or inside us and It unlock in our brain the true potential of life.

I think, guess it connect us on some frequencies.

The body vibrate, the brain send brain wave that are unique and without those drugs, it's difficult to reach it.

Those drugs aren't physically addictive, you will live it like an experience.

Hallucinogen are the keys for self exploring and understanding that YES, there is more than just this Life and your Life will not end here.

Your soul is designed to evolve.

It's a feeling not something you can see.

It's a huge feeling that doesn't leave me since years.

This feeling is now acknowledged to me.

I'm not afraid and I don't need any religion.

I want to die filled with Love and not Hate.

Filled with the idea that everyone here on Earth is happy and are hugging, re joying.

Did you know that LSD can also make you realize how disgusting are our addictions ?

Get your info about micro dosing.

I think today we need more a consciousness revolution than nuclear bombs.

All nations as one. In unity, in the trust and love.

I Really, Strongly believe that LSD, MDMA (Family hallucinogen) can solve this.

In One event even we could fix the issues on Earth.

International, Global.

Where everyone would allow himself to experience the Peace of Life.

FREE AND COMPASSIONATE.

Breathing hope and love. All together. United.

I'm tired of those that seek violence, power or to be above one or another.

Violence and Greed belongs to the past.

The future is clean and beautiful. We have the intellect to stop procreate and make children or/and to make all our food production efficient, scarcity is unreal.

There is enough for everyone.

It is the duty of Everyone to acknowledge that we are all part of this and that WE, YOU have the power to change things in PEACE.

The last piece will be when Police and Army will be with the people and not the government.

And remember that this revolution should have no blood, of any form.

Those in power are our BROTHERS AND SISTERS too.

They imagine doing good, but aren't. (Not all of them, some are deeply lost into the Dark side but can be helped/saved too)

In Life I trust thus in Love I trust.

In Love I trust thus in Life I trust.

## **Conclusion :**

Trust Life and do not fear what is natural.

Remember that  $0^0=1$

From nothing did born something.

Trust Life that Death is also just a process like being Born.

That will make you migrate to a new state.

A deeper state.

This 3D world is all a consciousness test.

To me, it sounds logic by nature that it is like this.

Otherwise it would encourage for smart species the selfish side attach to the belief that there is one life and so you have no consequences of your actions on Earth.

It is impossible to me to imagine that Life has been designed to just be 1 time and that there is no following.

Why our brain would have so much capacity and why is there so many things to discover ?

To just let us die ? Forever ?

Look.

As simple as that.

If 0 can become 1 by mathematics

Remember that I discover this by myself with L.S.D.

How Could I discover such thing ? Using logic, I wanted to know why life became and this came to my mind as clear as It was the answer, I was really tripping and my whole body vibrating while discovering that, and I didn't even know how to apply it mathematically speaking !! But I was 1000000% sure I was right on it, a real EUREKA pop up in my brain that day. Later on this video on youtube confirmed it, 2 weeks later. [What is 0 to the power of 0 ? - Eddie Woo](https://www.youtube.com/watch?v=r0_mi8ngNnM&t=1s)  
[https://www.youtube.com/watch?v=r0\\_mi8ngNnM&t=1s](https://www.youtube.com/watch?v=r0_mi8ngNnM&t=1s)

I never heard about it before...

Some people think that we can connect to frequencies with the help of deep meditation, hallucinogen.

I believe it's true. I feel it.

I was so happy, I felt it like the biggest discover of my life while not being able to prove it...

I let you imagine my face when I saw this video...I was bluffed that I, alone, in my room discovered such truth...

You can rationalize as much as you want.

But it's not because explainable yet by our actual level in science that it's unreal.

What are the things we will discover in 1000 years of science ?

Don't attach yourself to ideas that inspire Darkness, eternal Darkness.

Trust Life and act humans.

And don't be selfish, everyone deserve a good experience in life.

Because acting selfish like this system want, will push us toward extinction anyway and in the end.  
(Only the richest will survive)

It's just logic.

Look the movie "Don't look up", look the episodes of "Death, Love and Robot" where all human goes extinct.

Or this video of [Alien](#) that is telling us that we will all die because of our stupidity

Because of our strong beliefs, lack of intolerance, ego, selfishness, differences... Politic dogmas and Religions.

When will people realize that we are One.

When will people realize that the truth is inside you most of it and not in Religious book, none of them.

You should get inspire by religious book and should eliminate the passage that divide us, inspire violence because it can't be Right by nature. It's against God/Universe/Life balance, it's obviously wrong.

We are all part of something greater than ourselves.

So please accept my hand and be deliver from Fear Of Death.

Get far away from this Fear that will make you act like an animal to survive.

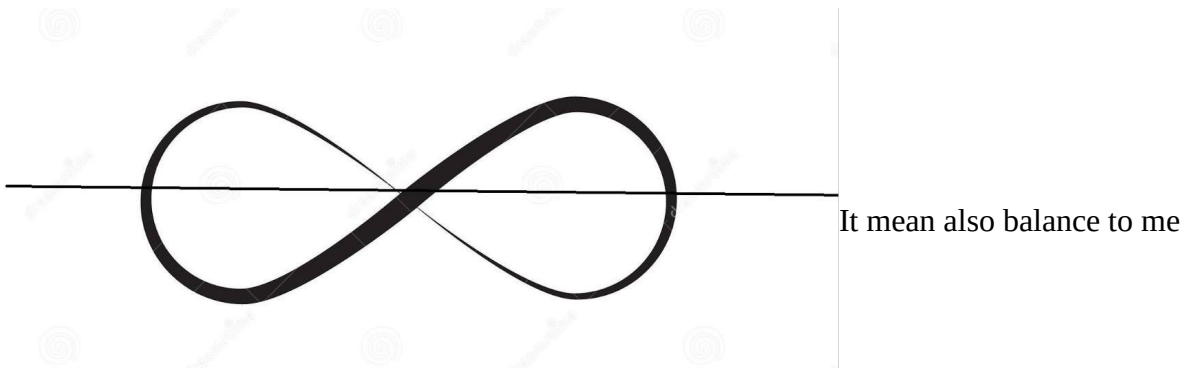

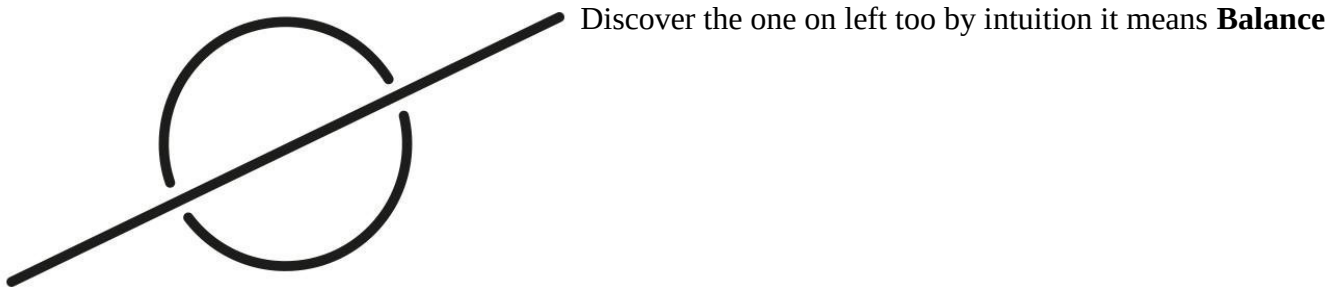

Are we animals ? Don't want we to evolve with the help of love, science and self exploration ?

**"Temet Nosce"** In The Matrix remember ?

I know my book is chaotic, (but to defend myself chaos = order in physic)

[https://en.wikipedia.org/wiki/Chaos\\_theory](https://en.wikipedia.org/wiki/Chaos_theory) like I said I'm not a writer, a scientist, a politician or whatever.

I'm just a normal person that want to spread the most neutral logic ideas that will help us to thrive toward Balance and Happiness for All. Eager to see a more compassionate world that work also toward the logic of the laws of the Universe.

I did this one randomly and just discover while writing the book that it's pretty similar to something I recently found in a video that is on the website [Chosen One](#)

Intuition is real and accurate with enough data.

Look the TV Show The Code (UK documentaries)

There is a moment where they ask people in an office a lot of them are being asked to guess the number of balls in a jar.

Everyone is wrong more or less but in the end when you do an average of all guesses you end up very close to the truth, it's crazy.

We have all the math inside us to discover the truth.

Or maybe we can connect to frequencies by "intuition" and find all the truth we want.

I think, we should do an experiment, like letting people try to find the truth all over the world on their own without being influenced by external sources and use hallucinogen to discover if we all find the same things.

Human on earth have always lived in a pyramidal system, with people that govern and people that are governed and with a hierarchy.

Is this really our future? For the rest of our lives or the history of our species? Is this what we can do as best? Really? Aren't we going to evolve?

Couple with that, there is always those religions, cultures, ethnics, races, political dogmas that want to divide us....

Take only the good from those books, remember.

If your religious books are teaching division and violence...Do you really think it comes from God?

Do you really think that source will make a difference between all his children? God is not into division, God is into harmony.

The only teaching of God should be to help others more than you can do for yourself, nothing else.

It should be toward Love and Only Love, toward every living thing and everyone.

On those last notes, I hope you get inspired by those ideas of mine even if my book isn't perfect, I did it in the hope that it can bring some peace on this world, some desire of unity and brotherhood in this immense unknown universe, we should be united because the person that we are is also everyone else and even every living thing.

The key of a good and happy life is based in the concept of putting the skin of someone else for a while to see what it looks like.

Selfishness VS Altruism

Everything works in duality, 0 and 1, Good and Bad, up and down, left and right, - and + etc.

It's up to every each of us to decide which side of the light we want to be.

Darkness or Light ?

Hate or Love ?

Nothing is eternal, not even the stage of death. All is transformation and evolution.

$0^{\circ}=1$

In Life Thus In Love I trust.

In Love Thus In Life I trust.

## **Compassion and Evidence**

You are free to use any of those writing to make good on Earth.

Those writings are the fruits of search of internal process thought and research  
from my whole life

I hope it can give you the tools to be free, it's up to you to decide what will be  
your/our reality.

But know that you are part of the collective, you are not alone.

I do not want to be recognized and point out as creator of this.

I do not look for recognition, fame or anything else, even the opposite would  
even please me more.

I really hope that those words will encourage you to want to reach yours and  
ours highest potential as species and as individual.

I Love You.
